

KEVIN DAVIS

Web Developer

Montreal, QC | daviskevin1@gmail.com | keviindavis.com | linkedin.com/in/keviindavis | github.com/keviindavis

PROFILE

Web developer working across design and development, building responsive websites and e-commerce experiences with Next.js, Shopify, and Webflow. Takes projects from Figma through deployment, including reusable component development, CMS and third-party integrations, and production launch.

TECHNICAL SKILLS

Development: JavaScript, React, Next.js (App Router), HTML, CSS, CSS Modules

Platforms & Services: Shopify (Headless, Storefront API), Webflow, Sanity, Stripe

Design & Motion: Figma, GSAP, Framer Motion

Tools: Git, GitHub, Vercel, Netlify

EXPERIENCE

Independent Web Developer, Nrthbnd Studio

Montreal, QC · nrthbnd.studio · 2025 - Present

- Design and develop responsive client websites from Figma through production using Next.js, Webflow, and Shopify, building reusable components and integrating CMS platforms and third-party services.
- Manage projects independently from client communication and scope through testing, deployment, and post-launch maintenance.

SELECTED PROJECTS

Sheabinta, Headless Shopify Storefront

Next.js · Shopify Storefront API · Sanity · Netlify · sheabinta.com

- Built a headless Shopify storefront in Next.js using the Storefront API for products, collections, cart functionality, and Shopify-hosted checkout.
- Integrated Sanity CMS for client-managed content and developed responsive product experiences with related-product recommendations and custom interaction patterns.

Paper Plane, Interactive Webflow Concept

Webflow · JavaScript · Barba.js · GSAP · paperplane.cafe.webflow.io

- Designed and developed an interactive café concept in Figma and Webflow, translating a custom visual system into responsive layouts and reusable components.
- Extended Webflow with Barba.js, GSAP, and custom JavaScript to create page transitions, animations, and interactions beyond native functionality.

Relai, Logistics Platform Concept

Next.js · CSS Modules · GSAP · Vercel · relailogistics.com

- Designed and developed a multi-page logistics platform concept from visual direction through front-end implementation, with responsive layouts and motion-driven interactions.
- Built reusable Next.js components and custom GSAP animations to create a consistent, fluid experience across the site.

Teach Roots, Youth Development Nonprofit Website

Next.js · Sanity · Stripe · Netlify · teachroots.org

- Designed and developed a responsive multi-page website for a Maryland youth development nonprofit, supporting programs, events, community involvement, and online donations.
- Integrated Sanity for content management and Stripe Checkout for online donations, connecting third-party services to a custom Next.js front end.

PREVIOUS EXPERIENCE

Psychiatric Rehabilitation Coordinator, Paths

Baltimore, MD · 2020 – 2025

- Managed a caseload of clients with concurrent service plans, documentation requirements, and deadlines.
- Coordinated with clinical teams and outside providers to keep services accurate, on schedule, and clearly communicated.
